F. W. ANDREWS

INTRODUCTION.

This list of vernacular names has been compiled from Broun and Massey's Flora of the Sudan, and from other records made by numerous plant collectors in the Sudan.

Some attempt has been made to check the accuracy of the botanical equivalents but no guarantee can be given that all are accurate. It cannot be too strongly emphasised that a vernacular name is seldom specific to one plant only unless it refers to a plant with a well-recognised use or to a very common herb or tree. For example, in the Northern and Central Sudan the Arabic word *Sunt* is used for one particular well-known tree, but the name *Kihan* may be given to any leaf having a strong smell. Vernacular plant names in the same language frequently differ from village to village and extreme caution must be used in accepting the botanical name as an accurate equivalent of the vernacular: the equivalent botanical name should always be checked with the description of the plant.

In compiling this list I gratefully acknowledge the assistance I have received from experts who have checked the spelling of the vernacular names; notably Major J. W. G. Wyld who checked the Zande list, Mr. T. R. H. Owen, (Arabic), Mr. A. C. Baton (Bari), Dr. R. Trudinger (Dinka), Mr. K. J. Nobbs (Nuba), Fr. C. Muratori (Lotuko) and Ven. Archdeacon Gibson (Kakwa, Fagelu). It is probable that only by the use of phonetic script can the true sound of a word be shown, but owing to the difficulty of printing the script and also to the limited number of people who understand it, it was decided to give as far as possible the equivalent in Roman characters.

As the title implies, this list is a temporary compilation intended for use with the first volume only of the revised flora of the Sudan. It is hoped to publish similar supplements with further volumes of the flora and on completion of the flora to combine all the supplements into one volume. By that date it is expected that many more names will have been collected and the present ones corrected so that the final volume will be a comprehensive list of vernacular plant names.

Blank pages have been included for noting corrections of the present list and for recording new names.

F. W. ANDREWS.

VERNACULAR NAME	LANGUAGE	BOTANICAL NAME
Ababiin	Beni Amer	Maerua oblongifolia
Abarubaru	Lotuko	Luffa aegyptiaca
Abban	Dinka	Capparis tomentosa
Abdalour	Jur	Cucumis dipsaceus
Abertgh	Shilluk	Cucumis dipsaceus
Abighoi (Logoforok)	Lango	Terminalia brownii
Abl	Arabic	Tamarix aphylla <i>orientalis</i>
Abola	Jur	Annona senegalensis
Abro	Golo	Courbonia virgata
Abrukab	Arabic	Achyranthes aspera
Abu Afia	Arabic	Momordica tuberosa
Abu Afin	Arabic	Momordica tuberosa
Abudeh	Shilluk	Crateva adansonii
Abu Efein	Arabic	Momordica balsamina
Abu Galagil	Arabic	Aristolochia bracteata <i>bracteolata</i>
Abu Hoi	Lotuko	? Terminalia brownii
Abu Khalafot	Arabic	Grewia villosa
Abu Leben	Arabic	Commicarpus africanus
Abu Leyug	Arabic	Grewia mollis
Abu Likeita	Arabic	Cleome brachycarpa
Abu Shoka	Arabic	Fagonia cretica
Abu Shweika	Arabic	Fagonia cretica
Abu Tamra	Arabic	Maerua oblongifolia
Abu Tumra	Arabic	Alternanthera nodiflora
Achobo	Acholi	Amaranthus blitum <i>gracizans</i>
Ad Dimmer	Arabic	Cadaba rotundifolia
Ademwel	Dinka	Achyranthes aspera
Adigisi (Logoforok)	Lango	Combretum gueinzii
Adimo	Jur	Combretum binderianum
Adlib	Hadendowa	Suaeda sp.
Adlib	Arabic	Suaeda monoica
Adlib	Arabic	Suaeda fruticosa
Adoghosi (Logoforok)	Lango	Combretum gueinzii
Adre	Moru	Terminalia avicennioides
Aduruka	Zande	Piper capense
Aduruka	Zande	Piper guineense
Afifiti (Logoforok)	Lango	Combretum binderianum
Afoka	Golo	Boscia senegalensis
Afungi	Kakwa	Christiana africana
Agbaro	Zande	Lindackeria schweinfurthii
Aghernom	Dinka	Celosia argentea
Agrab	Arabic	Aristolochia bracteata <i>bracteolata</i>
Agua	Golo	Syzygium guineense
Agud	Golo	Syzygium guineense
Agwuroi (Tabanyabaram)	Nuba	Anogeissus schimperi
