Sekil (Scale) 1:250,000

LAND CAPABILITY		ALIENATION AND GAZETEMENT	
	Class I land, possessing a high potential for mineral development and therefore best suited for mining		State land
	Class II land, possessing a high potential for agriculture with a wide range of crops and therefore best suited for diversified agriculture		Alienated land, including land provisionally allocated for this purpose
	Class III land, possessing a moderate potential for agriculture, but with a restricted range of crops, and therefore best suited for crops with a high level of tolerance to a range of soil conditions		Forest reserve
	Class IV land, possessing a potential for forest exploitation, and best suited for this purpose		Government reserve
	Class V land, possessing little or no potential for the exploitation of mineral, agricultural or forest resources, and best suited for conservation or recreation		Grazing reserve
	Land capability class boundary		Drainage and irrigation area
	Alienation and gazetement boundary		Alienation and gazetement boundary
